

EXTREMELY GOOD DRYING RESULT

BLINDS DRYING

- Cost saving and profit increasing drying process
- Extremely good drying result for the entire log
- The system, can be connected seamlessly, now or in the future, to a fully automated process

Lamellen drogen met BES Bollmann Drying and Control systems

Due to the increase in the cost price of the wood and the expected rise of the wood prices, the use of solid wood is becoming more and more expensive. The use of slats with a thickness of 3.5 mm - 9 mm is increasing. Drying slats is a completely different approach to the production and drying process. Do not take any risks with unnecessary testing, let BES Bollmann be your partner in this new application.

It is no surprise that a different drying process is required for this new application. BES Bollmann has years of experience with drying slats. In various parts of the world, the BES Bollmann systems, consisting of the Tromatic® 910 integrated with customized drying programs and drying protocols.

The drying of slats requires a specific approach, a specific drying program and in addition a balanced protocol to maintain the sawing profit during the drying process. All this is in the right hands with BES Bollmann.

Do you want to get more out of your wood, do you want to be future-proof and ensure the best results?

Please contact BES Bollmann. We are happy to advise you.
