

BES BOLLMANN THERMAL MODIFICATION KILN

SAFE, FULLY CONTROLLABLE AND EXTREMELY ENERGY EFFICIENT

- Safety for employees and the environment plus the quality of the end product is No. 1 and is 100% guaranteed at BES Bollmann.
- The efficient layout of the kiln and the efficient supply of heat make the process completely controllable.
- Extremely energy efficient, this leads to significant energy savings, lower production costs and a higher yield.

THERMAL MODIFICATION KILN

The transformation of different types of wood into sustainable applications for construction and utility construction is increasing more and more. The good and strong properties of the treated wood create an environmentally friendly and easy to process product. The wood undergoes special treatment to produce these sustainable products and BES Bollmann has a tailor-made kiln for these treatments. Using special BES Bollmann applications, technique, control and knowhow. In consultation with you, we produce the perfect fitting kiln for your process and products.

The kiln uses the very latest techniques. The heating elements are closer to the wood, the process can be monitored even better and considerably less energy is used.
